*** MTRIP Census:** Total number of rooms reported by participating MTRIP properties as available for short-term rental in the reporting month. This number can vary monthly as inventories and report participants change over time.

**** Destination Census:** The total number of rooms available for rental within the community as established by the Transient Inventory Study of July 2009 and adjusted for properties that have opened / closed since that time. This number varies infrequently as new properties start, or existing properties cease operations.

DESCRIPTION: The Reservation Activity Outlook Report tracks occupancy, average daily rate (ADR), and revenue per available room (RevPAR); the key metrics most of interest to lodging properties. The report combines the data sets of participating properties into a destination wide view that features three data sets (providing that sufficient information is available) including: i) current YTD occupancy, ii) last YTD occupancy, iii) last season's ending occupancy.

The Reservation Activity Outlook Report is generated on a monthly basis, usually for a 12 month subscription period, and is created from data provided by a group of properties participating in a cooperative manner, and representing a valid set of data as a result.

Report results are provided only to those properties who participate by submitting their data. Additionally, participating properties can order (on an a-la-carte basis) an individual report which shows the reservation activity of their property, measured against an aggregated set of competitive properties that they choose from amongst MTRIP's other participants.

As is the case in all MTRIP data, all information provided by individual properties is strictly confidential, except when aggregated with other data and indistinguishable as a result.

**Based on providing complete pacing data within a given month of occupancy only. Results may differ from those presented elsewhere in report if property set differs."

**Results for "percent change in incremental fill" indicate how room nights booked during the month just ended compare to room nights booked during the same month in the prior year, for occupancy in the month just ended and for the upcoming five months (as well as the six-month period in total). These results provide an indication of the degree to which booking activity occurring during the month just ended was greater or less than booking activity occurring in the same month a year ago – i.e. a measure of the strength of booking activity occurring during the month just ended.

NOVEMBER 2011 SUMMARY

Reno-Tahoe International Airport served 259,425 passengers in November 2011, a decrease of (4.1%) versus the same period last year. One of the main reasons for the year-over-year passenger decline is the lack of early-season ski traffic caused by dry weather conditions in Lake Tahoe. In addition, rising fuel costs which are typically passed on to travelers, continue to play a part in suppressing demand for air travel along with continued restructuring of airline networks. Calendar year-to-date passenger traffic at RNO is down (1.4%) at 3,472,752.

Reno-Tahoe International Airport handled 9,494,432 pounds of cargo in November 2011, a decrease of (2.2%) versus last year. Declining air cargo numbers at RNO reflect a general slump in the global air cargo market, as reported by airlines and airports worldwide. Hong Kong International Airport, the world's busiest air cargo hub, posted eight straight monthly decreases in terms of air cargo volume. Despite the recent decline in global air cargo, calendar year-to-date cargo volumes at RNO are up 1.7% to 100,525,855 pounds versus the same period last year.

In November 2011, RNO was served by six major airlines providing 54 nonstop departures each day to 16 destinations. RNO reported a (14.1%) decrease in the number of flights versus last year. A majority of the flight decreases are seasonal in nature and are expected to return in March 2012, which is the peak travel month at RNO. In addition to the seasonal decreases, Alaska Airlines eliminated non-stop flights from Reno to Los Angeles from its network in April 2011. United/Continental temporarily discontinued daily non-stop flight from Reno to Houston in October 2011.

The airline resumed this flight on December 15, 2011. The new non-stop flight to Minneapolis on Delta Air Lines continues to operate.

Total seat capacity was down (10.8%) in November 2011 versus the same period last year. However, average enplaned load factor for scheduled airlines was 77.6%, 10.5 load factor points higher than the prior year.

Total Passengers

TOTAL PASSENGERS

In November 2011, total passenger traffic at RNO decreased (4.1%) versus last year. Year-over-year passenger traffic of Delta Air Lines and US Airways increased 23.6% and 2.5% respectively. Southwest Airlines passenger traffic decreased (2.3%), American Airlines was down (2.4%) and United Airlines was down (12.3%). Alaska Airlines experienced a passenger traffic decline of (41.0%) for the same period as a result of ending their flights from Reno to Los Angeles.

Total Cargo

TOTAL CARGO

In November 2011, total cargo volume decreased (2.2%) versus November 2010. Year-over-year cargo volumes for FedEx and Ameriflight increased 8.6% and 1.3% respectively. UPS reported a decrease of (14.3%) in cargo volumes for the same period.
