\* MTRIP Census: Total number of rooms reported by participating MTRIP properties as available for short-term rental in the reporting month. This number can vary monthly as inventories and report participants change over time.

**DESCRIPTION:** The Reservation Activity Outlook Report tracks occupancy, average daily rate (ADR), and revenue per available room (RevPAR); the key metrics most of interest to lodging properties. The report combines the data sets of participating properties into a destination wide view that features three data sets (providing that sufficient information is available) including: i) current YTD occupancy, ii) last YTD occupancy, iii) last season's ending occupancy.  
The Reservation Activity Outlook Report is generated on a monthly basis, usually for a 12 month subscription period, and is created from data provided by a group of properties participating in a cooperative manner, and representing a valid set of data as a result.  
Report results are provided only to those properties who participate by submitting their data. Additionally, participating properties can order (on an a-la-carte basis) an individual report which shows the reservation activity of their property, measured against an aggregated set of competitive properties that they choose from amongst MTRIP's other participants.  
As is the case in all MTRIP data, all information provided by individual properties is strictly confidential, except when aggregated with other data and indistinguishable as a result.

\*\*Based on providing complete pacing data within a given month of occupancy only. Results may differ from those presented elsewhere in report if property set differs."

\*\*Results for "percent change in incremental fill" indicate how room nights booked during the month just ended compare to room nights booked during the same month in the prior year, for occupancy in the month just ended and for the upcoming five months (as well as the six-month period in total). These results provide an indication of the degree to which booking activity occurring during the month just ended was greater or less than booking activity occurring in the same month a year ago -- i.e. a measure of the strength of booking activity occurring during month just ended.

**FEBRUARY 2013 SUMMARY**

Reno-Tahoe International Airport (RNO) served 259,299 passengers in February 2013, a decrease of (2.2%) versus the same period last year. The extra day in February 2012, due to the leap year, created a notable year over year change in passenger traffic. Without the extra day last year, February 2013's year over year traffic would have been up 1.3%.

With respect to Air Cargo, RNO handled 8,635,807 pounds of cargo in February 2013, an increase of 4.4% versus February 2012. The growth in cargo volume is primarily driven by a general increase in domestic air cargo demand. The U.S. Census Bureau reported that overall retail sales increased 4.7% in February 2013 versus February 2012. Non-store retailers (i.e. e-commerce) sales increased 15.7% for the same period, a large contributor to northern Nevada air cargo. At RNO, the year-over-year cargo volume has been up for seven of the last eight months.

In February 2013, RNO was served by seven major airlines providing 57 nonstop departures each day to 15 destinations. RNO reported a (12.8%) decrease in total seats versus February 2012. Whereas, total flights were down (8.3%) for the same period. The U.S. airlines continue to reduce capacity by eliminating less profitable routes and down gauging aircraft size on certain routes, aligning it more closely with passenger demand to offset high operating costs.

Allegiant Air, however, began twice weekly non-stop flights between Reno and Las Vegas on February 1, 2013. The flights are timed to meet the needs of both leisure and business travelers alike. During the first month of service, Allegiant Air reported a load factor of nearly 90%.

Alaska Airlines began two non-stop daily flights between Reno and San Jose in June 2012, providing outstanding connections to the entire Alaska network each day.

The non-stop seasonal flight to Houston on United Airlines was temporarily discontinued in January. This flight resumed service on March 1.

In February 2013, the average enplaned load factor for scheduled airlines was 84.7%, 8.1 load factor points higher than in February of the prior year. This represents the highest February on record, in terms of load factor.

**Total Passengers**

### TOTAL PASSENGERS

In February 2013, total passenger traffic at RNO decreased (2.2%) versus last year. Year-over-year passenger traffic on Alaska Airlines increased 48.6%, due to the new non-stop flights to San Jose. With increased service to Los Angeles, American Airlines' passenger traffic grew 19.5% for the same period. Southwest Airlines' passenger traffic declined (3.6%) and US Airways reported a decrease of (9.1%). United Airlines reported a year-over-year passenger decline of (14.8%) due to the reduced seasonal capacity in all of its RNO markets. Delta Air Lines' year-over-year passenger traffic was decreased by (24.5%), partially due to the elimination non-stop flights to Minneapolis and reduced capacity to Salt Lake City.

**Total Cargo**

### TOTAL CARGO

Total cargo volume at RNO increased 4.4% in February 2013 versus the same period last year. The year-over-year cargo volumes of UPS and FedEx increased 6.3% and 3.3% respectively. Ameriflight reported a year-over-year decrease of (9.5%) for the same period.
